

Simplify your IHC Workflow using Comprehensive Staining Kits

Together we breakthrough™

Suitable for Manual and Automated* Applications

By offering individual kits with essential IHC workflow components in prediluted, ready-to-use formats, end-users are empowered with more consistent results through reduction of assay variables, avoiding the uncertainty of using mismatched reagents and ultimately saving time.

Key Advantages of Using Comprehensive IHC Staining Kits

- ✓ Reduce optimization requirements
- ✓ Save time with ready-to-use solutions
- ✓ Streamline the procedure with matched components
- ✓ Increase reliability and reproducibility of your staining results
