

ChromaLINK® Biotin (DMF Soluble)

B-1001

Product Images

Short Description

ChromaLINK Biotin contains a UV-traceable chromophore based on ChromaLINK technology, which enables reproducibility in your biotinylation process. Now you can measure the degree of biotinylation in minutes, not hours, without the standard curves required for HABA/avidin and fluoro-reporter assays. With a simple UV scan, you can quantify biotin incorporation and ensure reproducible production of consistent batches.

Additional Information

Label/Modifier Type	biotin
Reactivity	Streptavidin
Recommended Storage	Desiccated: -15° to -25°C
Applications	Antibody Labeling, Aptamers
Other Name(s)	SoluLINK Bioconjugation
