

# Goat Anti-Human IgM Antibody, Mu Chain, Unconjugated

## AI-3020-.5

[Product Images](#)

## Short Description

---

Unconjugated Goat Anti-Human IgM Antibody, mu chain specific, can be used for tissue and cell staining, ELISAs, and blots. This mu chain-specific antibody is produced specifically to distinguish between chains or classes of target immunoglobulins.

### Features:

- This affinity-purified mu chain specific antibody has virtually no cross-reactivity with other immunoglobulin classes or other heavy or light chains
- Ready for iodination, fluorochrome labeling, or enzyme conjugations
- Can be employed as a capture antibody in enzyme immunoassays or in other assays requiring carrier-free immunoglobulins

## Additional Information

---

|                     |  |
|---------------------|--|
| Unit Size           | 0.5 mg   |
| Applications        | Immunohistochemistry / Immunocytochemistry, Immunofluorescence, In situ hybridization, Blotting Applications, Elispot, ELISAs                              |
| Recommended Storage | 2-8 °C; Store frozen for long term storage   |
| Recommended Usage   | Reconstitute by adding 0.5 ml water. The resulting solution will have the following composition: 10 mM phosphate, pH 7.8, 0.15 M NaCl, 0.08% sodium azide. |
| Target Species      | Human  |
| Conjugate           | Unconjugated   |
| Host Species        | Goat   |
| Format              | Lyophilized  |
