

## Horse Anti-Goat IgG Antibody (H+L), DyLight™ 488

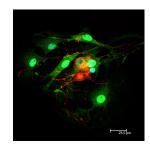

DI-3088-1.5

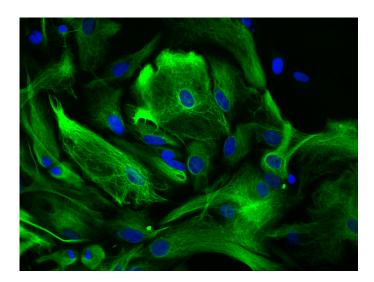

**Product Images** 

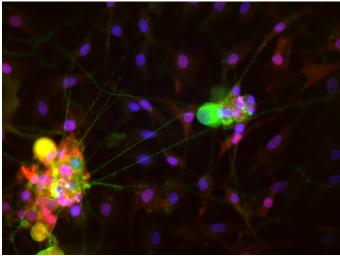

## **Short Description**

DyLight 488 Horse Anti-Goat IgG Antibody can be used for immunofluorescence and other applications. Optimal F/P ratios have been established for each conjugate to ensure maximum fluorescence with minimal background staining.

## **Features:**

- Affinity-purified, ultrapure, high affinity antibody
- Suitable for use with goat, sheep, and bovine IgG primary antibodies
- Thoroughly adsorbed against serum and immunoglobulins from potentially interfering species
- Recognizes both heavy and light chains (H+L)
- Optimally labeled with DyLight<sup>™</sup> 488 to provide the brightest label for fluorescence microscopy
- Supplied in solution
- Excitation: 493 nmEmission: 518 nm
- Color: Green

## **Additional Information**

Applications Immunofluorescence, In situ hybridization, Blotting Applications, Flow Cytometry/Cell Separation  Concentration 1.5 mg active conjugate/ml  Recommended Storage 2-8 °C  Solution 10 mM HEPES, 0.15 M NaCl, pH 7.5, 0.08% sodium azide.  Maximum Emission 518 nm  Maximum Excitation 493 nm  Recommended Concentration range for use 5-20 µg/ml. If this antibody is to be used in tissues which may contain cross-reacting endogenous immunoglobulins, dilution of this antibody may be made in buffers containing 2% normal serum from the same species as the tissue.  Target Species Goat  Conjugate DyLight 488  Color of Fluorescence Green  Host Species Horse  Format Concentrate
