

# Texas Red™ Avidin DCS, Cell Sorting Grade

## A-2016-1

Product Images

## Short Description

---

Avidin DCS, Texas Red® labeled, is a cell sorter grade of Texas Red® Avidin D. Through the development of a new method of labeling we are able to incorporate more fluorochrome into a protein without altering the properties of the protein. Not only does the Texas Red® Avidin DCS have a high F/P ratio, the efficiency of fluorescence is also increased. In addition to the improved conjugation technique, we employ a purification step to reduce nonspecific binding which can hamper resolution in cell sorting and other applications.

## Additional Information

---

Unit Size	1 mg
Applications	Immunofluorescence, In situ hybridization, Flow Cytometry/Cell Separation
Recommended Usage	For diluting this product, we recommend a HEPES- or bicarbonate-buffered saline solution, approximately pH 8.2. The recommended range of concentration for staining of cells or tissues is 5-20 µg/ml.
Solution	10 mM HEPES, 0.5 M NaCl, pH 7.5, 0.08% sodium azide, 10 mg/ml beta cyclodextrin
Maximum Excitation	595-604 nm
Maximum Emission	606-615 nm
Recommended Storage	2-8 °C
Concentration	2.0 mg active conjugate/ml
Conjugate	Texas Red
Color of Fluorescence	Red
Format	Concentrate
