

Rabbit Anti-Rat IgG Antibody (H+L), Unconjugated

Product Images

Short Description

Unconjugated Rabbit Anti-Rat IgG (H+L) Antibody binds to rat primary antibodies for immunohistochemistry and many other applications.

Features:

- Affinity-purified, ultrapure, high affinity antibody
- For mouse tissue applications, please see anti-rat, mouse adsorbed, secondary antibodies
- Recognizes both heavy and light chains (H+L)

Additional Information

Unit Size	1.5 mg
Applications	Immunohistochemistry / Immunocytochemistry, Immunofluorescence, In situ hybridization, Blotting Applications, Elispot, ELISAs
Concentration	3 mg/ml
Recommended Storage	2-8 °C; Store frozen for long term storage
Solution	10 mM sodium phosphate, pH 7.8, 0.15 M NaCl, 0.08% sodium azide, 20 mg/ml sucrose
Target Species	Rat
Conjugate	Unconjugated
Host Species	Rabbit
Format	Concentrate
