

AQUORA® TX595-NHS ESTER

SKU: QBD-11918LF

DESCRIPTION

AQuora® TX595-NHS Ester is an amine-reactive fluorophore engineered with SuperHydrophilic™ technology designed to improve solubility during labeling and of the dye labeled conjugate. As a result, the dye labeled conjugates made with AQuora® TX595-NHS Ester yield enhanced signal and signal-to-noise ratios in fluorescence-based applications including fluorescent western blotting, fluorescence-based microscopy, flow cytometry, and cell-based assays. AQuora® TX595-NHS Ester is a xanthene-based dye with photophysical properties comparable to Texas Red®.

This AQuora® TX595-NHS Ester dye is activated with a N-hydroxysuccinimide (NHS) ester group which reacts with free primary amines, such as the amines on the side chain of lysines, forming a stable amide bond.

Texas Red® is a registered trademark of Molecular Probes.

For research use only. Not intended for therapeutic or diagnostic use in animals or humans.

SPECIFICATIONS

Molecular Weight	1300
A280 Correction Factor	0.18
Extinction Coefficient	80,000
Format	Lyophilized
Unit Size	1mg
Storage Instructions	Store at -20°C. Protect from light. May ship at ambient temperatures.
Spectrally Similar Dyes	Texas Red®
Excitation/Emission Maximum	592 nm / 611 nm
Label	AQuora® TX595
Origin	United States of America
Reactive Group	NHS Ester
