

## **BSA AZIDE**

**SKU:** CCT-1535

## **DESCRIPTION**

BSA Azide is commonly used positive control for click chemistry-based enrichment of azide-tagged proteins. Bovine Serum Albumin (BSA) is chemically modified on a single cysteine residue with Azide-PEG3-Maleimide (MW 369.37).

Provided as lyophilized solid. To prepare a working 1 mg/ml solution, resuspend lyophilized BSA-conjugate in 500  $\mu$ l of 0.5 x PBS pH 7.4. DO NOT ADD sodium azide.

## **SPECIFICATIONS**

<b>Molecular Weight</b>	66.8 kDa
<b>Appearance</b>	Oil to grey amorphous solid
<b>Molecular Weight Left Behind</b>	369.37
<b>Unit Size</b>	0.5 mg
<b>Solubility</b>	Water, aqueous buffers

**For research use only. Not intended for therapeutic or diagnostic use in animals or humans.**

**Storage Instructions** 2-8C

`<p></p>`

**Purchase Note** `<p>Add some note</p>`

**Quantity** 1

**Shelf Life** 3 years at -20C

**Shipping Instructions** Ambient temperature
