ANTI-STREPTAVIDIN ANTIBODY, UNCONJUGATED

SKU: SP-4000-1

DESCRIPTION

Anti-Streptavidin antibodies have been widely used as amplifying reagents in immunohistochemistry, *in situ* hybridization, microarray assays, ELISAs, blots, and many other applications. Our antibodies to streptavidin are produced in goats using our highly purified streptavidin and isolated by affinity chromatography. Anti-Streptavidin does not bind avidin and Anti-Avidin does not recognize streptavidin. These antibodies provide opportunities to significantly amplify signals in many applications.
